

MIT Kerberos Status

June 2006

Sam Hartman

## MIT Kerberos 1.5—June 2006

- SPNEGO
- Multiple GSS-API Mechanisms
- Plugin architecture

## End of Kerberos 4

- MIT announced end of Kerberos 4 with the release of 1.4 over a year ago
- Upcoming versions of Kerberos for macintosh and Kerberos for Windows will have limited or no v4 support
- Kerberos 4 will not be considered in future design decisions.

## Future Plans

- Pkinit
- LDAP database backend
- Port of Kerberos Login Library to other platforms

## Kerberos Consortium

- Plan to bring vendors, application developers and large Kerberos sites together to fund and realize the Kerberos single sign-on vision
- Received approval to hire fund raiser and try and fund plan
- Waiting for final approval of the initial budget
